

“Head Up Mod. 2” Challenge

Objective:

This is not a timed event. The goal of this challenge is to maintain accurate sight alignment without continual visual maintenance during the shot. Once the competitor is staged and ready at the 10-yard line (pistol loaded and holstered), the competitor will draw their pistol from the holster and line up their sights on the silhouette steel target (pink). They will do this without shooting, finger off the trigger. Once the competitor is in that position and ready to start the challenge, they will verbally check with the timekeeper and make sure they are ready. The challenger, also known as timekeeper, will obstruct the line between the competitor’s eyes and the sights of the firearm with some solid object (a piece of cardboard, the challenge binder, etc.), large enough to block the line of sight, but small enough to not disturb the competitor’s body placement. Unlike the *Head Up Challenge*, the competitor will not tilt their head back. Once the competitor’s vision is obstructed, the competitor will say “Standby... Go” and begin the drill. The competitor will then move their finger onto the trigger and engage the silhouette steel target (pink) with 3 rounds. To successfully pass this challenge, the competitor and the challenger(s) must complete the exercises and tasks.

IMPORTANT: *Since the shooters vision is obstructed at the time of shooting, the competitor, also known as the timekeeper, along with anyone else on the range will act as a safety. If they observe the shooters pistol start moving in an unsafe direction or any other unsafe motion/act, they will immediately call a cease fire. The competitor that is holding the solid object must make every effort to keep their body behind the line of fire.*

Tasks:

Sight alignment with minimal deviation and hit (ding) on target

Distance:

10-yard line

Loadout:

1 magazine with 3 live rounds

Time:

N/A

Targets:

1: Silhouette steel plate (pink)

Skills Strengthened:

Sight alignment, trigger control, and point shooting
